

Blackberry: Internet Service Configuration

This article will assist you with setting up your Blackberry, using Blackberry Internet Service "BIS", for your Hosted Mailbox.

Note: This setup process may be different, based on your mobile provider. If you have trouble, try reaching out to your mobile provider for assistance. Typically, your provider will offer free assistance with configuring Blackberry services.

1. On your computer, navigate to your provider's Blackberry Internet Service configuration website. Below is a list of a few popular providers. If your provider is not listed, please contact your provider for the proper URL.

Provider	URL
Verizon	https://vzw.blackberry.com
AT&T	https://att.blackberry.com
Sprint (Nextel)	https://sprint.blackberry.com
T-Mobile	https://t-mobile.blackberry.com
U.S. Cellular	https://uscellular.blackberry.com

2. If you're new to Blackberry Internet Service, use the above website to create an account. Otherwise, log in. Once logged in, select "Set Up Email".
3. Select "Add an existing email account".

Set Up Email

Add an existing email account (e.g. Yahoo!®, Google®, Microsoft® Exchange)

Need an email account (name@att.blackberry.net)?

Add an existing email account (e.g. Yahoo!®, Google®, Microsoft® Exchange)

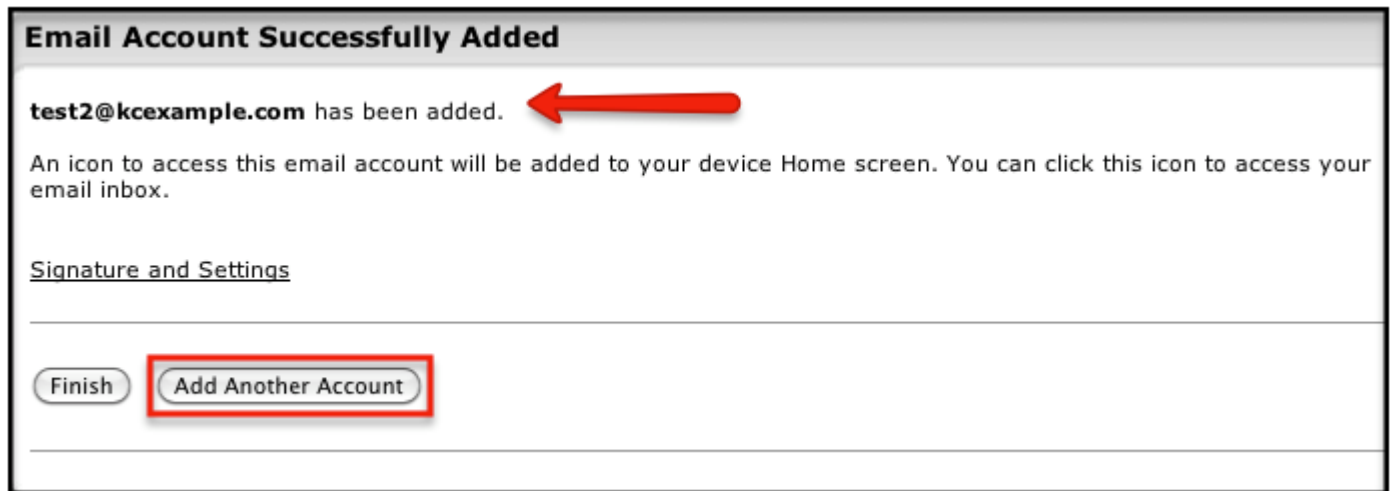

Email address: ?

Email password: ?

Show Password

4. Enter the following, if required:
 1. "Email Address": **XXXXXX**@salishmail.com (**Replace XXXXXX with your mailbox name**)
 2. "User Name": **XXXXXX**@salishmail.com

3. "Incoming Email Server": secure.emailsrvr.com
4. "Outgoing Email Server": secure.emailsrvr.com
5. After your account has been added, you should receive a confirmation on your mobile device.

6. Now you're done! Your email should begin syncing within a few minutes.
